Project Design Phase-I
Solution Architecture

Date	13 October 20222022
Team ID	PNT2022TMID36162
Project Name	Project – Fertilizers Recommendation System For Disease Prediction
Maximum Marks	4 Marks

Solution Architecture:

- Deep learning techniques are used to identity diseases, through image processing.

- The customers gives in the image, the user interface accepts the image and goes inside the DL algorithm

- First its train the data and test the image data ,then gives the output.
